

11
1653.

A new
ALMANACK

and Prognostication for
the Year of our Lord
God, 1653.

*Being the first after Bissextile or
Leap-yeere.*

Which shewes the natural
inclination of the aire, and judge-
ment of the *Weather*, according
to the *Aspects* of the *Planets*,
and positions of the
Stars.

With other RULES, TABLES, and
Directions, convenient in such a
work to be noted.

L O N D O N,

Printed by R. & W. Leybourn, for
the Company of Stationers.

The beginning and ending of the Terms
with their Returns and Essoyn dayes, dayes of
Exception, Return. Brevium, and dayes of Ap-
pearance, for this year, 1653.

Return dayes, or dayes of Essoyne	Dayes of Exception	Return. Brevium	Dayes of Appearance.
--------------------------------------	-----------------------	--------------------	-------------------------

Hilary Term begins January 24, and ends the 11
of February, and hath four returns.

Octab. Hil.	Januar. 24	January 21	January 22	January 24
Quind. Hil.	Januar. 28	January 29	January 31	January 31
Craft. Parif.	February 3	February 4	February 6	February 7
Octab. Pari.	February 9	Februa. 10	Februa. 11	Februa. 12

Easter Term begins the 27 of Aprill, ends the
23 of May, and hath five returns.

Quind. Pas.	Aprill 25	Aprill 25	Aprill 26	Aprill 27
Tres Pasch.	May 2	May 2	May 3	May 4
Mens. Pasch.	May 9	May 9	May 10	May 11
Quinq. Pas.	May 16	May 16	May 17	May 18
Craft. Ascens.	May 20	May 21	May 23	May 23

Trinity Term begins the 10 of June, ends the 25
of June, and hath four returns.

Craft. Trin.	June 6	June 8	June 9	June 10
Octab. Trin	June 13	June 14	June 15	June 16
Quind. Tri.	June 20	June 20	June 21	June 22
Tres Trin.	June 27	June 28	June 29	June 29

Michaelmas Term begins the 14 of October, ends the
28 of November, and hath six returns.

Tres Mich.	October 20	October 21	October 22	October 24
Mens. Mich.	October 27	October 28	October 29	October 31
Craft. Ani.	Novemb. 2	Novemb. 3	Novemb. 4	Novemb. 7
Craft. Mar.	Novem. 12	Novem. 14	Novem. 14	Novem. 15
Octab. Mar.	Novem. 18	Novem. 19	Novem. 21	Novem. 21
Quind. Ma	Novem. 25	Novem. 26	Novem. 28	Novem. 28

Note this generally, that the first and last dayes of each
Term, are the first and last dayes of appearance.

The Anatomy of mans body as the parts thereof
are governed by the Moon in the 12 Signes.

Fit times for Blood-letting.

The sanguine from the new to the first quar.
The cholerick, from the first quarter to the full.
The flegmatick from the full to the last quar.
The melancholy, from last quarter to change.

Dangerous times for Blood-letting.

In the heat of Summer or cold of Winter, or
when the moon is in the Signe which governs
that part of the body you would let blood, also
within two dayes of the change or full moon.

The common Notes and moveable Feasts

For this Yeer

For the next yeer

May 19	Ascension day	May 4
May 29	Whitsunday	May 14
Novem 27	Advent Sunday	Decemb 3

A brief description of the particular things contained in this Almanack.

In the Almanack are 8 rows or columns in each month, the first is the number of dayes, the second the dayes of the week, in the third are the Festival dayes, and other both fixe and moveable, the beginning and ending of the Terms, with the change of the aire, the 4 is the age of the moon, the 5 is the motion of the moon (or the Signes, as we call it, through the Zodiack) the 6 is the new full and quarters of the Moon. the 7 and 8 is the time of high water at London Bridge.

As for Example, the 10 of January being Monday, the Moon is 21 dayes old, and the Signe is in the reins, and that day it is high water at London bridge at 7 a clock & 48 minutes past in the morning.

The glorious Planet Venus hath bin our bright morning Star from the 5 of September the last yeer 1652. to the 27 of June this present yeer 1653, and from thence to the 16 of Aprill the next yeere 1654. she is our evening Star, shining very bright in the evening after the Sun is set.

January hath xxxj. dayes.

Warm meats, thick cloaths, this moneth are good,
No Phisick, Bathes, or letting blood.

1 day, Sun riseth at 8 and 3 min. Sets at 3 and 57 min.
15 day, Sun riseth at 7 and 44 min. Sets at 4 and 16 min.

 Litchfield.

A

A Geographical epitomic of the Map of England and WALES, wherein is shewed how each Shire bounded and joynd to each other, and what Point of the Comp every County lyeth from the Honorable City of London; (being lately published) The use of which, and the next Table, is explained, on the backside of the other Leafs.

North

South

For the road (after the next leaf) the whole compass is divided into the North of England & Wales, with the chief Rivers of that be-
long to the same: Also the compass, length, & breadth of Ireland:
But for Scotland, it is hard to be measured, the Islands being so
scattered, & the sea being so wide, being about 300.

An Alphabetical Catalogue of all the Shires, Cities, Market-Towns, Castles, Parishes, Rivers, and Parks. in everie particular Shire in England and Wales; with the distance of miles, and points of the compas from London.

The Explanation & Vse of the former Map & Table

First for the Map: The figures in each shire of the map, are to shew you the names of every County, & the Letters in the same are for uses, as I will shew hereunder.

You must understand that London is in Middlesex, which County of Middlesex hath the figures of 22 in it, & the little black speck. & 2 spot therein signifieth London. Now if you would readily find the name of any shire therein, and how many miles the middle of the said County (in a straight line) is from London, & what point of the Compass it lyeth from the said City; resort then to the Table of Shires on the other side, and it will resolve you.

As for example, Berkshire it hath the figure of 1 in the map, also it hath likewise in the Table; whereto is shewed that the middle or heart of that shire is 40 miles from London in a straight line, & it lyeth full west from the City, and looking forward toward the right-hand, it sheweth it hath no City, 11 Market-Towns, 2 Castles, 140 Parishes, 3 Rivers, & 13 Parks. Again, Buckinghamshire hath the figure of 3 in the Map, & so it hath before it in the Table, the heart or middle of which shire is from London 35 miles, & lyeth North-west & by west from the said City, it hath no City, 11 Market-Towns, no Castle, 185 Parishes, 2 Rivers, and 15 Parks; and so of the rest.

The use of the Letters in the Map is this, S Scotl. signifieth part of Scotland, I part of Ireland, F part of France, M the Isle of Man, W the Isle of Wight, L the Lizard point, H Holy-head, the * the Irish Sea, B the British or English Sea, G the German Sea, Ba Barwick, D Dover, N Newcastle, C the points of Compass, S the Scale of Miles, by which you may measure the distance of any place, for every black degree is five miles, 10 is every white.

The 39 Shires from Berkshire to Yorkshire are the English Shires, & the other 13 from Anglesey, to Radnorshire are Welsh.

It may be something further in Miles to the middle of each shire, by reason of the crookedness of the Highways, Hills, and vallies, but what is here set down is meant in a straight line from London, as is said.

The

The Compasse, Length and Breadth of *England*, and the chiefe Ilands thereof.

England is in compasse ————— 1532. miles.
 The greatest length thereof Northwards and South-
 wards, from Barwick to the Land's end, is — 986. miles.
 The shortest length from Barwick to Calshot Castle in
 Hampshire, is ————— 286. miles.
 The broadest place from the Lands end to Sandwich,
 is ————— 279. miles.
 from S. Davids in the West in Pembroke-shire, through
 the midst of Worcester and Warwick-shire Eastward to
 Yarmouth in Norfolk, is ————— 240. miles.

The Ile of MAN.

The Ile of Man is in compasse ————— 91. miles.
 The length is ————— 28. miles.
 The breadth is ————— 18. miles.

The Ile of ANGLESEA.

The Ile of Anglesea is in compasse ————— 85. miles.
 The length is ————— 21. miles.
 The breadth is ————— 18. miles.

The Ile of WIGHT.

The Ile of Wight is in compasse ————— 57. miles.
 The length is ————— 22. miles.
 The breadth is ————— 11. miles.

The Compasse, Length, and Breadth of IRELAND.

Ireland, respecting the adjacent Ilands, and some Indrass,
 is in compasse ————— 948. miles.
 The length North and South, is ————— 303. miles.
 The breadth East and West, is ————— 113. miles.

The

A Prognostication.

The explanation of the former Table.

NOte that every King began his reign, the same time that the next precedent King ended his.

If you desire to know how long it is since the beginning of the reign of any King, look how long it is since the ending of the precedent King, and there you shall find your request.

As for example: if you would know when King Henry the 8 began his reign, how long he reigned, & also how long it is since his reign: find out first his name amongst the names of the Kings, & searching the row towards the right hand, you shall find he began his reign in the year 1509. the 22 of April, and under the title of the time that he reigned, is 37 yeares, 19 moneths, & 2 dayes: And looking forward in the same row, where is 144 yeares, April 22 under the title of since his reigne began.

How to judg what Weather will follow, by the rising and setting of the Sunne.

The Sun rising bright & clear, signifieth a pleasant day: If he rise fiery red, it promisseth rain: if in his rising he be thinly overcast with a cloud, it betokeneth foul weather: if the sun & the clouds be fore him into the West, it signifieth fair weather. if at his rising there appear a circle about him, & vanish away equally, it betokeneth fair weather. Also if he setteth red, it signifieth fair weather: If at his setting he be of divers colours, or clouds like water, it threatneth rain. If at the rising of the Sun, his beams seem red, or long, or encompassed with red clouds it signifieth great winds: if at his rising there appear a thick mist, or if it raineth in the evening, it threatneth very foul weather to follow. Also if the Sun be as he spotted either green, pale, or black, or as he red to a cloud it signifieth rain. The Sun setting clear without any cloud, signifieth a fair night to ensue. If the

C

cicle

circle, or circles about the Sun be clear, & of no continuance, look for faire weather: If there be many circles, it signifieth winds: the redder they are, the more vehement winds. If the circles are here & there broken, & are thick & black, look for cold wind or snow: or if he settle behind a great black cloud, rain follows.

How Weather is foreknown by the Moon.

If the Moon in the third day of her change, or three dayes before her full, or in the midst of the quarter, be round of pure light, nothing compassing her, the ends direct up, she promisseth faire weather: but bent to red colour, prouoketh winds. The Moon pale, or somewhat black or thick, threatneth rain. When the Moon is five dayes old, mark the typps of her horns, if they be blunt, it signifieth rain: if sharp pointid & pitching upwards, great winds. If in the fourth day after her change, she have a red circle about her, it signifieth winds and rain.

Of the judgment of Weather by the Stars.

If the Stars appear of much light, and seem to be of more bignesse and blazing then ordinary, it betokeneth great windes and moisture in that part where they seem so; and in Winter, great frosts. When dim Stars appear with long scerpayles, it threatneth winds, and great drought: the more in number, the greater will be the effect. Also when Starris seeme to shoot or fall, it signifieth great winds in that place: If they seem to shoot in diuers places, it signifieth diuers windes: If in all places, windes, thunder, lightning, and most tempestuous weather.

How to iudge of the weather by the Clouds.

Black clouds flying from the east, signifieth rain at night, if from the west, rain the next day: if they flye low, and appeare to settle upon the tops of hills, it is a signe of cold weather, if they

White, 1653.

be full charged, and appear white like snows, hail is at hand: if white clouds appear in winter, two or three days together at sun rising, it is a signe of cold and snow, but black clouds signifie rain. A red sky in the evening, and a gray morning is a sign of a fair day. Mist falling in the morning, in spring or harvest, shew mists over ponds or waters in the morning shew rain. If the clouds fly swiftly in the ayre, it signifies rain from that part of the heavens, especially from the north or south. If thick white clouds gathered together in many places like flocks or heaps of wool appear in many places, it is a sign of rain: but if thick dark clouds towards the north or west nêr the earth, presently rain and if like hills a little above the earth, foul weather is ober. If mists descend from the hills, and settle in the valleys, it is a sign of fair hot weather next day: or if white mists arise from the waters in the evening.

How to judge of the weather by the Rain-bow.

The natural signification of the Rain-bow, is to shew rain either past or to come. The Rain-bow appearing when it is fair is a signe of foul weather: when it is foul if it appear, it is a sign of fair weather, the greeder it appears the more rain, the redder the more wind; if before noon then the rain is spent; if the rain-bow appear about one or two in the afternoon then rain is nêr. A rainbow in the morning is a sign of hot (unless there be brought in the air) if it appear in the evening it is a sign of fair weather (unless the air abound with moisture.) A rain-bow at night opposite to the moon, is a sign of much small rain and wind to follow. A rain-bow after long rain is a sign of fair weather presently; if two rainbows appear together, it is a sign of rain within one or two days after.

*Certaine and short Rules, for the comforting
of the chiefe officiall Members of the
Body of Man.*

Things which are good to comfort the Head.

Lignum-Aloes, Marjorinum, Salingale, Muske,
Rosemary, Roses, Camomell, Rue, Frankin-
sence, Nutmegs, Hyssop, Balme, Mints, Spike, and
Clayden.

Things good for the Eyes.

Fennell, Herben, Cloves, Cold-water, Celendine,
Cybright, Roses, and Agrimony.

Things good for the Stomack.

Nutmegs, Cloves, Dillanum, Corall, Saffron,
Quinces, Wormwood, Olibanum, Agrimony, Fuma-
tory, Mastick, Lignum-Aloes, Spodium, and Corian-
der prepared.

This good for the Heart.

Saffron, Cloves, Synamon, Mace, Nutmegs,
Marjorinum, Burrage, Buglosse, Rosemary, Mirra-
lanes, Bearles, Lignum-Aloes, Corall, Muske, and
Setwell.

Things good for the Liver.

Liverwort, great Raisons, Wormwood, Agrimony,
Saffron, Cloves, Endive, Aloes, Fennel, Plantain,
Dragons, Rose-water, Lettuce, Violets, Sanders.

Things good for the Lungs.

Uscots, Raisons, Almons, Dates, Lungwort, Mar-
den-haire, Ellicampane, Distaces, and Benedes.

Things hurtfull for the Body.

Meates hurtfull to the Teeth.

Nettes, Meats very hot, Colardes drinke, Sweet-
meats and drincks, Radish Rootes, Hard meates,
Bitter meates, Milk, much Aomiting, Leeks, Far-
fish, Colworts, and Lemmons.

Things hurtfull to the Eyes.

Garlick, Onions, Radish, Drunkenesse, Lettberg,
Sweet & chikc Meats, salt meates, Colworts, all Pulch,
Must, Ollie, Dill, Smack, Fire, and washing yelow
ly after Supper.

White. 1653.

Of the Eclipses this year 1653.

There will happen 4 Eclipses this year, 2 of the sun and 2 of the moon, whereof the first of the sun will only be seen in England. The first is a little eclipse of the sun upon the 17 of Feb. in the night time, to be seen in Magellonica, and the south part of the world unknown to us.

The second is a great & total Eclipse of the moon happening upon Friday March 4. & will be visible to us in our meridian at Tuddington (if clouds hinder not. and darkened by the earths shadow as this type sheweth.

The beginning will be 48 min. 20 sec past 1 of the clock in the morning. The beginning of total darkness 58 m 47 sec past 2 a clock. The middle or greatest obscuration 52 m 39 s past 3. The time opposition 54 m.

17 sec past 3. The end of total darkness 46 m 35 s past 4. The end and full recovery of the sun line, 56 m 58 s past 4. The digits eclipsed are 18. 42 m. 36 seconds.

The third eclipse is of the sun upon the 12 of August, but happening in the night time it cannot be seen of us in England, yet in the north-west parts from us it will be a little conspicuous, as in north America, and such places

A the Sun.

B the earths shadow.

C the Moon

as lie near the Artique-circle and Longitude, 238
degrees.

The fourth eclipse is of the moon, upon the 28 of August near 11 A.M. and will be seen of our Antipodes, and by them that are distant from us 6 houres; as well towards the east, as towards the west. viz. In the East Indies, China, Mexico; the east part of Peru, as also in the Islands of Sumatra, Java, Borneo, Leccia, Molacco, Phillippines, new Guinea, the eastern Magellanica, the quantity eclipsed being 18 Digits, and the whole continuance 3 h. 45. min.

The Explanation of a new and easie K A L E N D E R here following, for this present Yeare, 1652.

Note that every Month containeth three Rows of Columns (the Figures for the number of daies excepted) The first Columne toward the left hand containeth the Week Dayes and Sunday Letter; the second the Signe wherein the Moon is every day. And the third the Changes & Quarters of the Moon. Note that the being thus O figured, doth signify the New Moon; & placed thus (way is the first Quarter: this  the Full Moon: and again this ) the last Quarter. Note also that the Figures over the head of the Moones doe signify the howe of her Change, Full, or Quarters, and the Letters above or beneath, the time after noon, or after midnight, N standing After noone till Midaighe. and M for after Midaight till Noone.

As for example, against the 7 day of January, being wednesday, I doe find the Moon (or Signe) in V. Aries, or the head, and is thus  charactered, which is the Last Quarter, at 10. of the clock at night. Again, on the 15. of March, being monday, I doe find the Moon in π . Virgo, or the belly, and is thus  charactered, which is the Full Moon, at 4. of the clock in the morning, or after midnight; and so of the rest.

Note, also, that at the head of every month is plac'd the rising and setting of the Sun for the midst of every month. As for example, for the midst of January, the  Sun riseth at 7. of the clock and 43 minutes; and setteth at 4. and 17 minutes, &c.

It also containeth (on the back side of the Leaf) for every month the Feastes both Moveable and Fixed, with the beginning and ending of every Terme: As Twelfth day is on the 6. of January, Easter day is on the 18. of April, Whit-Sunday is on the 6. of Iune, Terme begins on the 18. of Iune, and endeth on the 7. of Iuly, &c.
